1. Plants on the **Conservation List** may be exhibited only in the Education Division of a Standard Flower Show. A card must be included stating how they were obtained and give botanical and common names. Official written permission is required to gather any native plant material in California and must be made available for confirmation.

2. Plants not on the **Conservation List** may be exhibited in the Horticulture Division of a Standard Flower Show only when grown by the exhibitor and properly labeled. They may also be entered in the Design and Education Divisions when the exhibitor has grown or acquired them in a lawful manner. You must include both botanical and common names and state how they were obtained.
